

3 window gatehouse

Smoking shelter

STEEL CABIN RANGE FOR HIRE AND SALE

Site security, safety and welfare

Portable Space offers a number of different specially-designed units for site security, safety and welfare, for hire and sale. These include Security Huts, Turnstiles, Smoking and Vaping Shelters.

Security

Security Huts and Gatehouses help staff to keep the site secure, greet visitors and also restrict access to plant, equipment and materials, preventing unauthorised use and theft.

Both can be located on the perimeter of the site and provide a perfect environment for security staff, complete with heating and lighting. The Gatehouse has been designed with windows on three sides to give an unimpeded view of the entrance for maximum security.

Portable Space also offers Site Access Turnstile Units which use biometric systems to help control the flow of staff or visitors and keep sites secure. They can also provide management reporting, time and attendance details and assist with Health & Safety compliance, as well as be integrated with other building systems to give greater control over the environment.

Welfare

Contractors are also responsible for meeting welfare regulations to protect workers' health.

The Smoking and Vaping Shelters are robust steel structures and open-sided to comply with smoke-free regulations, whilst also meeting the need to keep smokers away from flammable materials and equipment.

Smoking and Vaping Shelters can be located anywhere within the compound and are fitted with lockable ashtrays.
