STEEL CABIN RANGE FOR HIRE AND SALE

Site storage, shipping and flat pack containers

Portable Space offers a range of options to help you store plant, tools, equipment, household items, sports equipment, archives, raw materials and completed stock.

Stackable Site Storage Containers

Available in 12' x 8', 20' x 8', 24 x 9' and 32' x 10', these units incorporate several security features. They are also compatible with stacking underneath almost any other unit of the same size from the Steel Cabin Range and, depending on the door position on the top unit, access can be provided with a Portable Space staircase. This means that all units have a uniform appearance which is often important on high profile sites.

Space on site can be optimised, with heavy items stored at ground level and the top units used as offices, drying rooms and meeting rooms, which benefit from a 360 degree view of site operations and arrivals.

The 20' x 8' steel storage container can house 6m lengths of materials such as pipe, steel and wood. However as these units are not built for shipping, they do not have heavy duty door seals so are not as vermin-proof as shipping containers. Please note that the 20' shipping container is exactly 6m long and so cannot house 6m lengths of materials.

Shipping Containers

Designed originally for carrying materials around the world and being stacked up to eight units high, each fully loaded with 30 tonnes, not only have these containers been responsible for globalisation but they also make excellent on-site storage.

Available in 8', 10', 20' and 40' lengths, shipping containers are all 8' (2.44m) wide, apart from the 8' container which is 7' wide.

We stock four grades of hirefleet shipping container:

- **Furniture Shipping Containers** are clean on the inside, have vermin-proof door seals are usually suitable for most types of furniture and archive storage.
- **Standard Shipping Containers** have double doors at one end, are available in all sizes from 8' to 40' and are ideal for all other forms of storage.
- **Budget Shipping Containers** are available for hire and are more cost-effective than other options. These are painted in the shipping lines' original colours and are only recommended for storing items such as construction materials and equipment where functionality is more important than appearance.
- **Special Shipping Containers** for hire include 20' full side access, 20' double door and 20' or 40' high cube (300mm higher than a standard shipping container) for specialist uses. Bundled stores are also available in 10' and 20' lengths.

Flat Pack Containers

On some sites it is not possible or safe to deliver containers by lorry-mounted crane because of weak or low bridges, overhead obstructions such as power lines or restricted site entrances and access.

The Flat Pack storage range is a practical solution and sufficiently light to be offloaded in sections from a small van or trailer, with each section compact enough to be manoeuvred through small passageways.

These units are also an alternative to the traditional garden shed. They are available for sale in 2m, 3m and 4m lengths by 2.1m wide, however for hire they are only available in 3m lengths.

The Flat Pack range also includes a bundled Chemstore which incorporates a secondary internal structure to protect the environment from spills of chemicals or liquids stored inside.

User Guide – Storage Containers

	Site Store	Shipping Container	Flat Pack Container
Vermin proof	No	Yes	No
Stackable with steel cabin range	Yes	No	No
