

ADJUSTABLE, HEAVY DUTY TWO TIER RACKING FOR REAR OF CONTAINER

Quickfind Code: 1065

Part Number: SALE 2 TIER RACKING FOR REAR OF CONTAINER

£330.00 (exc. VAT)

£396.00 (inc. VAT)

PRODUCT DETAILS

For the provision of racking in the container end, we offer a single bay of 1850mm two tier racking that can be assembled in the container.

It comprises two pre-assembled 2m high and 600mm wide end frames connected by 2 beams per shelf. The beams easily slot into the end frames and include safety clips.

All steel items are powder coated (blue and orange) for a scratch resistant finish and include a 25mm chipboard shelf with a capacity of 550kgs per shelf, the shelf height is adjustable in 50mm increments.

The end racking can be used in conjunction with the [two tier side racking in a 20ft container](#) and [two tier side racking in a 40ft container](#) but not in a 10ft container as there is not enough space.

This racking can also be used alone in any container.
