£3,312.00 (inc. VAT)

PRODUCT DETAILS

Promotional Offer – Get a free set of 4 Eco Foundation Pads with each flatpack store purchased online in April. To claim this offer add the free Eco Foundation Pads pack from the product options into your basket.

The 6m XL flat pack store is a great alternative to a 20ft shipping container – especially following the recent increase in shipping container prices. The XL badge means its taller and wider than the standard [flat pack container range](#).

Whilst it still benefits from being flat pack compared to the standard range (2m, 3m and 4m flat packs) it does require a more skilled team for erection. This is mainly due to the larger and heavier parts necessitating access to some lifting equipment to move the parts and to assist with erection. This could be a suitable forklift, telescopic handler, crane or overhead gantry. Other than the floor and roof component parts can still be moved by hand if necessary – but typically require 4-6 people and a risk assessment to do so.

The need for mechanised lifting does not limit the unique benefits of the Portable Space flat pack range. It's still possible to locate the 6m XL in places that a normal HIAB equipped vehicle could not deliver. For example, on construction sites or playing fields, the component parts can easily be moved with an all terrain forklift, telehandler or small flat bed truck across fields and tracks that would make it either impossible or exceptionally expensive for delivery of a standard container. Alternatively the unit can be purchased ready built by us, for an additional charge.

COMBINE MULTIPLE FLATPACK STORES

A unique selling point of our 6m XL flat pack store is the opportunity for modular construction. By linking 6m XL stores end-on-end or side-by-side you can create incredibly large spaces. Traditional offerings cannot compete in terms of speed, price and the flexibility to relocate when needed. The side-linked set up gives you the opportunity to create your own fulfilment warehouse for your online business on your doorstep – a mini warehouse for a fraction of the cost of almost any other option.

FORKLIFT POCKETS

Unlike the [smaller stores](#), the 6m chassis is fitted with forklift pockets that enables safe lifting with a forklift when flat packed or assembled. These pockets can also be used for lifting from above with straps fed through each fork tunnel. The roof is fitted with 4 lifting points for lifting from above with suitable chains or straps.

NEED A 6M STORE BUT DON'T HAVE THE REQUIRED LIFTING EQUIPMENT?

If you need a 6m store and you either do not have access to suitable lifting equipment or you need to move all parts by hand then please take a look at our [6m x 2.1m flatpack container bundle](#) – this is 2no 3m flat pack stores joined with a linking kit. These are easier to handle and all parts can be moved with a team of 4 people.

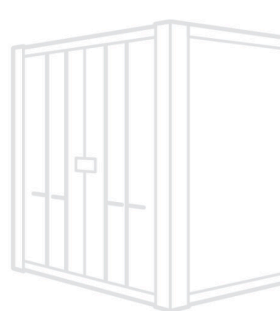

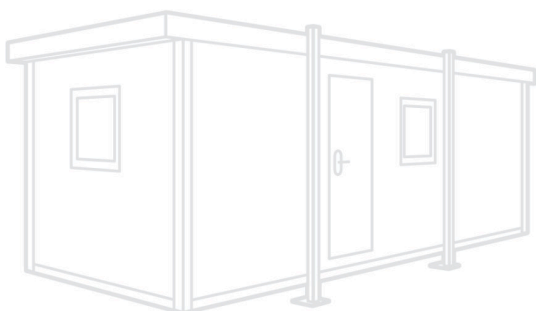

This 6m XL flat pack store is available to buy online and can be delivered throughout the UK. To calculate delivery costs please add this item to your online lorry and enter your postcode. If you have a suitable vehicle click & collect is also available from our HQ in Suffolk.
